

RAXB300

3U blank shelf

DESCRIPTION / APPLICATIONS

Whether a conventional point-to-point system or a fully fledged multi-zone environment, organisation of the numerous components is essential when creating the perfect installation. The equipment rack can typically become a very complex place, especially when employing multiple point-to-point extenders, repeaters and break out boxes.

The RAX series of racking solutions offers installers the ideal solution to house multiple components neatly and securely, but still offering simple access for servicing. The RAXB300 is a 3U blanking plate compatible with the RAX300.

A range of accessories are also available to power, cool, as well aesthetically complete the installation.
