

The background of the image is a collection of 3D topographic models arranged on a light blue surface. Each model represents a different industrial or environmental sector. From top-left to bottom-right, the models include: a cornfield with a blue truck; a green hilly landscape; an offshore oil rig on a dark blue sea; a desert landscape with a wind turbine; a city skyline; a large dam on a rocky river; a solar farm with blue panels on a green forested hill; a rocky canyon; a factory with a tall chimney; a satellite dish on a green hillside; and another industrial facility with large storage tanks. The models are rendered in various colors like green, yellow, brown, and blue, and cast soft shadows on the surface below them.
